

ENVS 6530 - FALL

NATURAL RESOURCES ADMINISTRATION

Course Description: The primary goal of the course is for natural resources professionals to develop and/or expand their knowledge of administrative issues, techniques, and practices in natural resource management through readings, discussions with colleagues, and interactions with other professionals who manage natural resources. Secondary goals include (a) improving one's professional 'toolbox' for administering natural resources agencies in the 21st century context of cooperative natural resources management and conservation; (b) demonstrating one's value to peers as an important source of insights and information, (c) improving formal writing skills, and; (d) recognizing peers as important sources of enhancing one's own professional insight and information.

**Earn two graduate credit hours*

**Semester based online course*

Instructor: Dr. Nat B. Frazer
Director of MNR Program and Professor for ENVS
