

Thomas C. Edwards

***A Primer on the
Management and
Manipulation of Ecological
Data Using R***

Contents

Foreword

Preface

List of Tables ix

1	Primer Introduction	1
1.1	The Purpose of this Primer	1
1.2	What is R?	1
1.3	Why the focus on data management and manipulation?	2
1.4	How this Primer is Structured	2
1.5	Chapter Descriptions	4
2	The R Environment - Introduction	5
2.1	Chapter Purpose	5
2.2	What is meant by the R Environment?	5
2.3	Aquiring and Installing R	6
2.4	GUI's, IDE's, and text editors in R	8
2.5	Opening and Exiting a R Session	10
2.6	Packages in R	10
2.7	What is the workspace in R?	14
2.8	Help!	21
2.9	Memory Management in R	24
2.10	Properly Cite R Base and R Packages	25
2.11	Summary	27
2.12	Exercises	27
3	Data Management in R	29
3.1	Chapter Purpose	29
3.2	What is meant by data management in R?	29
3.3	Cautions and caveats related to data management in R	30
3.4	Types of R objects - an emphasis on mode and class	31
3.5	Data distinctions in R	33
3.6	How to import data into R	43
3.7	How to access variables in a R data object	52
3.8	Coercing R data characteristics	58
3.9	Data Reshaping	62

3.10 Data Checking	66
3.11 Export R Data Objects to Your OS	71
3.12 Exercises	73
4 Data Manipulation in R	77
4.1 Chapter Purpose:	77
4.2 What is Meant by Data Manipulation in R?	77
4.3 Operators and Functions in R	79
4.4 New Variables and Objects	82
4.5 Extracting Subsets of Data	88
4.6 Data Splitting	93
4.7 Conditional Statements in R	98
4.8 Merging and Combining Data Objects	103
4.9 Sorting, Ordering, and Ranking	108
4.10 Looping in R	113
4.11 Custom Functions in R	120
4.12 Summary	125
4.13 Exercises	126
